Independent single-Gaussian fits near each peak
Original: Ground state
μ = −0.034 ± 0.020 MeV
σ = 0.679 ± 0.025 MeV
Deviance / ndf = 1.69
(a)
Counts / 0.1 MeV
Excitation energy (MeV)
MLP: Ground state
μ = 0.660 ± 0.021 MeV
σ = 0.696 ± 0.027 MeV
Deviance / ndf = 1.23
(c)
Counts / 0.1 MeV
Excitation energy (MeV)
Original: First excited state
μ = 3.313 ± 0.009 MeV
σ = 0.670 ± 0.011 MeV
Deviance / ndf = 1.12
(b)
Counts / 0.1 MeV
Excitation energy (MeV)
MLP: First excited state
μ = 3.989 ± 0.010 MeV
σ = 0.705 ± 0.013 MeV
Deviance / ndf = 0.46
(d)
Counts / 0.1 MeV
Excitation energy (MeV)
